

HYDROTAN

YOUR CLIENTS HAVE LESS AND LESS TIME FOR EVERYTHING - EVEN PAMPERING. HYDROTAN FROM HYDRO^{CO} ALLOWS YOU TO MAKE THE MOST OF THIS, BY DELIVERING EXCELLENT RESULTS, IN MINUTES.

SIMPLE AND EFFICIENT, THE HYDROTAN UNIT IS AN ECONOMIC DYNAMO FOR YOUR BUSINESS. WHILE YOUR CLIENTS ENJOY THE BENEFITS OF A UV FREE, NATURAL-LOOKING TAN, YOUR SALON WILL ENJOY A DISTINCT COMMERCIAL EDGE, AND HEALTHY PROFIT.

CONVENIENCE

- Rapid application of tanning solution
- Option of a steam treatment or shower in the booth enables the busy client to prepare their skin immediately prior to the application of their tan
- The mist extractor / filtration system ensures client comfort, and accelerates the tan drying time
- A deeper, darker tan can be achieved by simply adjusting the application time
- Audio voice prompts are integrated into the design to direct the client and minimise any anxiety around the operation of the spray tan booth

COMFORT

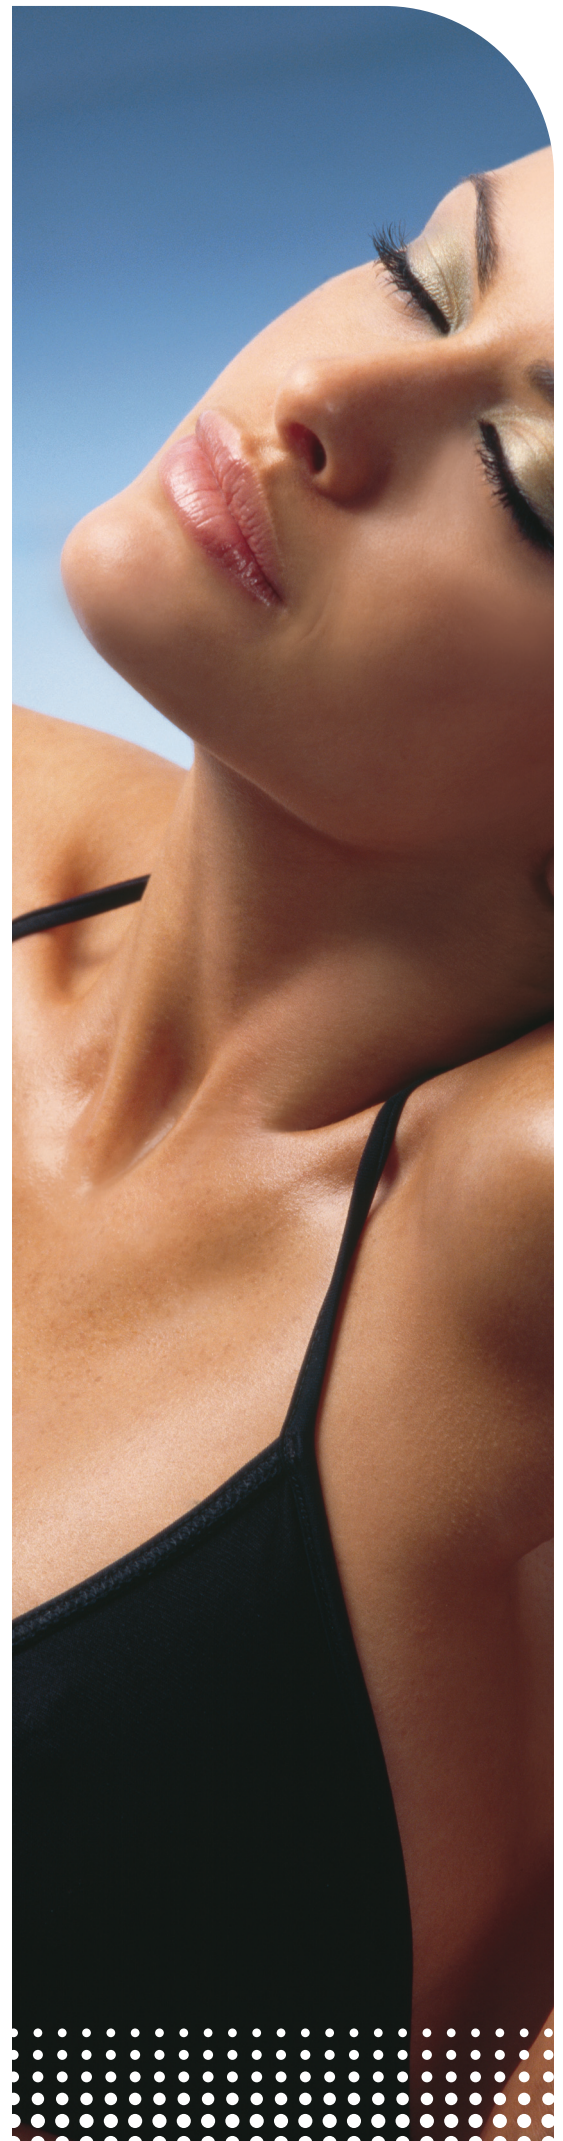

- The Hydrotan extraction system rapidly replaces tan mist with fresh, filtered air

SOUND BUSINESS INVESTMENT

- Return on investment comes as a result of Hydrotan's reliability and affordability
- A three year warranty supports your investment

PEACE OF MIND

- The ultimate UV-free tanning system, Hydrotan is designed and manufactured by HydroCo, Australia's leading innovator and designer of products for the international wellness industry

HydroCo understands that the application of a spray tan solution to the body is an inexact science. Critical to a successful tanning outcome is the preparation of the skin. Whilst many clients are advised to exfoliate prior to a tanning application, many are unprepared when they arrive. HydroCo have addressed this problem by offering shower and steam options in the Hydrotan booth - which means the client can exfoliate and appropriately prepare their skin before their spray tan is applied.

Utilising a decade of design expertise, HydroCo have incorporated a number of innovative features into the Hydrotan system, enhancing the entire tanning process. These features include high atomizing spray jets, a quiet activating compressor, a high flow extraction / filter system, auto booth rinse, auto voice prompt step-by-step instructions, reception desk control software and an on-board touch pad control.

Hydrotan's unique extraction / filter system rapidly removes the spray mist from the booth, replacing it with filtered air. This process not only provides added comfort for the client but also accelerates tan drying time.

TO MAXIMISE HYDROTAN TANNING RESULTS, HYDROCO MAKE AVAILABLE CLIENT-CARE CONSUMABLES. THESE INCLUDE:

- Booties, shower cap, nose clip, eye protection, filtered mouth guard and post-tanning care information
- Point of sale client information
- Retail product range that includes exfoliating body scrub, body wash, after-tan daily moisturiser and tan touch-up solution

WE VALUE OUR REPUTATION

HydroCo knows that the outcome of any spray tan process is dependent on many conditions (including skin type and skin preparation) that are as important as the tanning solution itself. To protect the HydroCo reputation, and in-turn your own investment, the Hydrotan system should be operated using only solutions and procedures recommended by HydroCo.

Retail product price list is available on request.
